Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant indicated in the interview that the combination of Atkinson and O'Donnell does not teach the step of a server system 'certifying that the product originates from the entity using sensitive information of the entity stored on the server system' as stated in claim one and now clarified in amended claim 8. The Applicant argued that the Office Action correctly noted that Atkinson does not teach this step and that O'Donnell is directed to an access system where user is granted access for an application but O'Donnell does not teach the step of certifying that the product originates from the entity. The Examiner noted the applicants comments.
